PROFESSIONAL SUMMARY

Dedicated and driven professional with a strong Sociology and Computer Science foundation, complemented by practical experience in data analysis, IT, and front-end development. Adept at leveraging no-code and low-code development methodologies, with a proven track record of problem-solving, collaboration, and delivering high-quality applications. I am committed to applying my skills and knowledge to make a positive impact in the field of data analysis and software development.

EDUCATION

University of Calgary <i>Bachelor of Arts: Sociology, Minor in Computer Science</i>	Expected Grad: Dec 2024 <i>Calgary, AB</i>
---	--

WORK EXPERIENCE

S01VE Cyber Solutions (Contractor) <i>Business Development</i>	Mar 2024 – Sept 2024 <i>Calgary, AB</i>
<ul style="list-style-type: none">▫ Strategic Thinking: Developed and implemented business strategies increasing company revenue and market share.▫ Client Consultation: Consulted with clients to understand their IT needs and provide tailored solutions.▫ Client Experience: Fostered and maintained strong client relationships ensuring long-term partnerships.▫ Market Research: Conducted market research to identify new business opportunities in IT and stay ahead of industry trends.	
No-Code Solutions (Start-up) <i>Intern UI / UX Developer</i>	Feb 2023 - Aug 2023 <i>Calgary, AB</i>
<ul style="list-style-type: none">▫ No-Code and Low-Code Development: Created efficient web and mobile applications using no-code and low-code platforms. Visual interfaces, pre-built components, and modules were used to develop functional and visually appealing applications.▫ Problem Solving: Identified issues, troubleshoot problems, and proposed effective solutions. I am experienced in debugging and resolving errors within no-code and low-code environments to optimize application performance.▫ Collaboration: Worked effectively in collaborative development environments. Communicated ideas, shared knowledge, and contributed to team discussions and brainstorming sessions.	

WORK EXPERIENCE continued

Concorde Entertainment Group

Server

Mar 2021 - Mar 2024

Calgary, AB

No-code and Low-Code Development

UCD and TCD Design Methods

Computer Hardware and Software Knowledge

UI/UX Design (Figma and Canva)

Java, Python and React Programming

Front-End Development

Data Analysis and Visualization

Fluent in Spanish

PROJECTS

Retail Renaissance: Focused on UI/UX design, data integration, and responsive layout. This project involved building both a backend and frontend for hardware companies to organize their stock, orders, shipments, users and a homepage to display data using charts. This project highlights my abilities as a full-stack developer and **highlights my ability to manage databases using SQL.**

DnD Nearby: Developed an **intuitive front-end design for a social media web app** that ensures users can complete any task within three clicks from any page. Focused heavily on user experience, incorporating features like breadcrumbs, help links, and color-coded buttons to enhance usability and minimize errors. Designed a central hub for forums, a dynamic group section for users to create or join groups, a learning section with curated resources, an organized area for storing game information, and a personalized account section for settings and achievement tracking. This approach streamlined user interactions and significantly boosted site engagement.

Plutus (Calgary Hackathon 2024): Developed a financial literacy **mobile application** inspired by Duolingo, aimed at gamifying financial education. The app was designed to make learning about financial concepts engaging and accessible through interactive lessons and quizzes. It was a part of the 2024 Calgary Hackathon and was ideated, designed and coded within 24 hours.
